PROFESSIONAL SUMMARY

Software Developer with 6+ years of experience, specialized in mobile and frontend development with React Native, React, Expo and Node.js. I currently build and maintain mobile apps for major healthcare brands (Dental Cremer, Dental Speed and Utilidades Clínicas — Henry Schein, NASDAQ:HSIC), used by thousands of users and rated 4.9/5 stars on the App Store and Google Play. Experienced in critical e-commerce features (checkout, virtual try-on, voice search, biometric authentication and 2FA), monorepo architecture, private NPM libraries and Design Systems, always focused on performance, security, accessibility and software engineering best practices.

TECHNICAL SKILLS

Mobile:	React Native, Expo, Android, iOS, biometric authentication, accessibility
Frontend:	React, Next.js, Redux, Styled Components, Material UI, Design Systems
Backend:	Node.js, AdonisJS, REST API integration, Google Cloud (GCP), Speech-to-Text
Architecture:	Software architecture, Domain-Driven Design (DDD), monorepos
Languages:	JavaScript, TypeScript, Python
Tooling:	Git, GitHub Actions, Turborepo, Firebase, Jest, NPM (private libraries), Claude Code, Jupyter Notebook, Matplotlib
Methodologies:	Scrum, agile methodologies
Spoken languages:	Portuguese (native), English (basic to intermediate)

PROFESSIONAL EXPERIENCE

React Native Mobile Developer — Bamse

March 2022 – Present · Blumenau, SC, Brazil (remote)

- Developed and maintained the mobile applications for Dental Cremer, Dental Speed, and Utilidades Clínicas (Henry Schein – NASDAQ: HSIC), serving thousands of users and maintaining a 4.9★ average app store rating by delivering new features, bug fixes, and continuous improvements using React Native.
- Developed key application features, including the product details page, voice search, biometric authentication, social authentication, two-factor authentication (2FA), and virtual try-on, following software engineering best practices and integrating with internal APIs and native platform capabilities while focusing on performance, security, and maintainability.
- Implemented the Pix payment flow in the checkout process, integrating the mobile application with internal APIs to deliver a secure, reliable, and optimized purchasing experience.
- Implemented the shared Design System across all three applications using Styled Components, increasing component reusability, ensuring UI consistency, and improving development productivity.
- Improved the accessibility of the mobile applications by implementing screen reader support and accessibility best practices to provide a more inclusive user experience.
- Reduced development time by approximately 30% and increased code reuse across applications by creating shared private libraries for components, themes, and business logic.
- Contributed to the migration of the applications' architecture to a monorepo, significantly reducing setup, development, and maintenance time by centralizing shared libraries, standardizing the project structure, and simplifying dependency management.

Front-end Developer React/React Native — Softaliza

September 2020 – February 2022 (1 yr 6 mos) · Santa Maria, RS, Brazil (remote)

- Developed key features for the Ciente Studio event platform, including event microsites, microsite management dashboard, registration flow, and live streaming module, following software engineering best practices with a focus on scalability, performance, and maintainability.
- Implemented Zoom integration for the Ciente Studio platform, enabling live event streaming through APIs while ensuring a reliable and stable integration.

- Performed technology upgrades and maintenance for the Camobi Segura mobile application, modernizing dependencies, implementing bug fixes, and improving application stability and reliability.

Full-stack Developer React/React Native/Node.js — Zion Tech

May 2020 – August 2021 (1 yr 4 mos) · Caxias do Sul, RS, Brazil (remote, part-time)

- Developed the Você + Saúde mobile application using React Native, implementing health monitoring features with a focus on performance, quality, and maintainability.
- Developed a backend service using Node.js and AdonisJS, centralizing communication with APIs and implementing secure and scalable integrations.
- Developed a responsive landing page using Next.js, applying best practices for performance, SEO, and responsiveness to support user acquisition.
- Developed the Stewart Acid-Base mobile application, creating a clinical decision support tool for healthcare professionals by implementing reliable clinical calculations and an intuitive user interface.

Undergraduate Researcher — UCS (Universidade de Caxias do Sul)

July 2017 – July 2019 (2 yrs 1 mo) · Caxias do Sul, RS, Brazil

- Developed a force measurement system capable of detecting nanonewton-level forces using a quartz piezoelectric sensor and Python scripts, enabling high-precision measurements for experimental applications.
- Presented the piezoelectric sensor project at the 27th Young Researchers Conference at the University of Caxias do Sul (UCS), sharing the academic results and their scientific applications.

EDUCATION

BSc in Computer Science — UCS (Universidade de Caxias do Sul)

January 2015 – July 2021

Thesis: mobile app prototype to support children with dyslexia, built with React Native, Node.js, Domain-Driven Design and Google's Speech-to-Text API.

CERTIFICATIONS

- GoStack 10 Bootcamp — Rocketseat (June 2020)
- Complete Web Design — Origamid (December 2019)
